

Currently

Senior product designer at **Tomahawque** **started** January 2020

Working within a cross-functional product development team on a cyber security training and capture the flag platform. Originally working for Magnetic Rock, our team and product were acquired by the SANS Institute in January 2021.

I contribute across the entire product development life cycle including:

- Conducting interviews with security professionals and students. Allowing myself and the rest of the team to understand our users needs and truly empathise with them.
- Running and planning usability tests to verify my research hypotheses and design solutions. I typically create code prototypes as I find this provides more generative feedback.
- Maintaining a searchable and scalable research repository that provides visibility into all facts, insights and recommendations generated from research evidence.
- Working with product manager and development team lead to establish roadmap priorities.
- Crafting high fidelity designs and journeys (typically using Figma or code) to feed into the development sprints and get sign off from stakeholders.
- Regularly presenting to key stakeholders and c-suite. Presentation topics include sharing research findings, prototype demos, and high fidelity concepts.
- Operating as an additional front end developer and contributing to the codebase when extra resource is required.

Mentor at **Women's Tech Hub** **started** May 2020

WTH's mission is to support the development of a tech industry that is inclusive of all so that it reflects the wider society. As well as 1-1 mentoring I run WebDev101 where I teach prospective developers and designers how to collaboratively create web apps. Focusing on usability, maintainability and component driven design.

Was

Digital designer at **Proctor + Stevenson** **from** October 2018 **to** January 2020

Interaction design, presenting to clients, and building and maintaining design systems.

Digital designer at **RAC** **from** March 2018 **to** October 2018

User testing and prototyping iterations of the payment journey with external agencies.

Digital designer at **Element78** **from** March 2017 **to** March 2018

Visual design and animation for new and existing client websites and apps.

Junior designer at **Unite Students** **from** July 2016 **to** March 2017

Visual design and user research on MyUnite app and corporate website.

Designer and developer at **Filtration Ltd** **from** February 2016 **to** July 2016

Rebrand and rebuild of companies website and printed marketing material.

Intern at **Advansys** **from** September 2014 **to** September 2015
